ANS Reference List Style

General information:

*Citations in the text to references shall be numerics strictly in order of their first appearance. Please do not repeat references and do not use ibid., op. cit., or loc. cit.

*All references should be cited in the text in numerical order, in order of appearance, as a superscript number outside any punctuation. However, when a reference is placed next to a number, abbreviation, measurement, or acronym, it is written out as (Ref. xx) to distinguish it from an exponent or other type of superscript.

*References must be listed in numerical sequence, double spaced, on a separate page.

*If there are three or more authors, list the first author only and use “et al.” If there are one or two authors, please list them.

*Put author names in all capital letters, listing first-name initials first.

*Use commas to separate all elements of each entry (except for the date or year, which is often in parentheses—see specific examples below).

*Paper titles: Words are initial capitalized, except for articles, coordinating conjunctions, and prepositions of four or fewer letters.

*Volume number (if given) is in bold; issue number (if given) is in italics; page number is roman.

*Authors are strongly encouraged to supply the full titles for the respective references.

*Acceptable Abbreviations:
